Main device:
Circular metal casing (alu or brass)
White translucent dome to diffuse LEDs color below
Potentiometer to adjust brightness

Optional: Diffuser dome should have a windrose pattern on top
to remind of navigation debossed

Gestures would be tap detection and/or capacitive touch on different areas of the
dome to navigate LEDs color animations. With a built-in accelerometer tilting, colors
could shift

Wrist bracelet materials:
Paracord with metalic knot
Optional: metalic piece should reflect
nautical environment
